Wants and Activities in Marshall. By Talcott Parsons. 101
Yellow Dog Contract, The. By Joel I. Seidman 348

A PREFACE TO ECONOMICS

By **BROADUS MITCHELL** — **Johns Hopkins University**

"Mitchell's text is in some respects novel, and exceedingly attractive for undergraduates who appreciate the human side of a rather technical subject. I sincerely commend the author for his effective presentation." — O. F. Boucke, *Pennsylvania State College*

"It impressed me favorably. The informal style should make it attractive to the beginner, and the biographical sketches will be serviceable to both instructor and student." — J. T. Holdsworth, *University of Miami*

"It is an interesting text and I have examined it with some care. I especially like the historical sketches." — J. E. Gould, *University of Washington*

MODERN ECONOMIC SOCIETY

By **SUMNER H. SLICHTER** — **Harvard University**

The American Library Association has placed this book among the notable fifty books of 1931. In a recent dissenting opinion, Justice Brandeis cited it more than once. Other recommendations include those of Professor Nystrom in the *Publishers' Weekly*, Louis Rich in the *New York Times*, R. G. Tugwell in an article on economics in *Roads to Knowledge*, George Soule in the *Survey*, S. H. Patterson in the *Annals*, Shorey Peterson in the *American Economic Review*, and John Ise in the *Quarterly Journal of Economics*. Among many recent adoptions may be mentioned those of Harvard University, University of Texas, Purdue University, as well as the College of the City of New York and the various branches of Northeastern University

MATHEMATICS OF FINANCE

Revised Edition — ***By*** **H. L. RIETZ, University of Iowa**
A. R. CRATHORNE, University of Illinois, and J. C. RIETZ

A very thorough revision, including the improvements made possible by advances in the field, or suggested by ten years' experience with teaching the old edition. The book presents the applications of mathematics to a broad class of financial problems in an unusually clear and teachable way. Changes for the new edition include: tables more than twice as extensive as before, and the simplification of material which the new tables make possible; nearly double the number of problems; the division of some chapters, and the inclusion of new material. A feature of the text is its ready adaptability to courses of varying length.
